

The graph displays three functions, labeled b, c, and d, plotted against a horizontal axis ranging from 0.0 to 2.0. The vertical axis ranges from -1.0 to 1.0. Function b (blue line) starts at (0,0), increases to a maximum value of 1.0 at x=1.5, and then slightly decreases to approximately 0.9 at x=2.0. Function c (red line) starts at (0,0), increases to a maximum value of 1.0 at x=0.8, and then decreases, crossing the x-axis at x=1.5, to approximately -0.8 at x=2.0. Function d (yellow line) starts at (0,0), increases to a maximum value of 1.0 at x=0.5, and then decreases, crossing the x-axis at x=1.0, to approximately -0.3 at x=2.0.
